

# FX

Leading another revolution in tire performance management, PressurePro again breaks the mold with the release of FX. The first BYOD based TPMS option designed specifically for towable and light fleet markets, FX allows users to leverage PressurePro's leading Sensor technology alongside existing smart devices; delivering the market's most trusted and proven monitoring, at never-before-seen value.

Designed for boaters, racers, campers, equestrians, ATV's, light/gray fleets and more.

Leveraging existing devices as displays, customers unlock the ability to utilize PressurePro's unparalleled Sensor technology at unbeatable prices.

Unrivaled tire capacity and pressure range, as well as unit storage abilities, users experience unequalled capabilities including instant toggling of units.

PP's custom App, provides unsurpassed ease of installation and use while fully customizable alerts provide unmatched safety and savings.

**The market's first TPMS designed for towables and light fleets, PressurePro's FX arms users with unmatched capabilities at unrivaled value.**

UNRIVALED CAPABILITIES, DELIVERING  
UNMATCHED SAFETY AND SAVINGS.

## SYSTEM HIGHLIGHTS AND FEATURES

-  **REAL TIME PRESSURE & TEMPERATURE READINGS**  
Arm drivers with performance data, moving or parked
-  **5 UNIQUE ALERTS** (2 low pressure, high pressure, high temp, cross axle)  
Provide the market's most comprehensive warning system
-  **CUSTOM DESIGNED PRESSUREPRO APP** (Android/iOS)  
Guides users seamlessly through installation and use
-  **PUSH NOTIFICATIONS AND FX WARNING LIGHT**  
Ensure notice to performance issues even when 'out of app'
-  **40+ TIRE CAPACITY AND 8-200 PSI CAPABILITY**
